

Why offer fixed price Cloud Servers?

Whether you are looking to move an existing on-premise server to the cloud or you are building new solutions, the Vuzion Cloud Server solution offers the power and reliability of Azure at fixed prices, perfect for SMBs. Remove the complexity of Azure pay-as-you-go billing and turn to Vuzion Cloud Server's fixed cost server solution.

KEY FEATURES

Choose the size you need

Select the Cloud Server based on the CPU, RAM, storage, and operating system requirements

Optional VPN and backup

For added security and peace of mind, you can add a secure VPN and data backup

Data transfer included

All Cloud Servers include data transfer and a static IP address

Secure and compliant

Benefit from Microsoft's more than \$1bn a year investment in IT security and more compliance certifications than any other cloud provider

KEY BENEFITS -----

No Azure skills needed

Cloud Server is easy to order and provision, meaning no Azure skill are required

Additional monthly recurring revenue

Moving on-premise servers to the cloud can help increase your monthly recurring revenues and profits

Flexible, scalable pricing

With Cloud Servers, you only need to pay for the size of server that your customer needs

Deployment services

One-off revenue opportunities from proof of concept to production deployment, including migrating data, implementing security best practices and establishing governance controls
